

FIELD TRIAL

THE LED SOLUTION THAT STANDS ABOVE THE REST

INTERESTED IN SEEING HOW AN LED UPGRADE CAN WORK FOR YOU?

Lumacurve provides airports with the opportunity to conduct field trials with its LED upgrade kits. With a field trial, an airport considering making the switch to LED can see exactly what goes into an installation, ensure electrical circuit compatibility, and test performance and reliability. Plus, a field trial gives your operations and maintenance teams an opportunity to go hands-on with our technology and see the benefits of our LED system firsthand.

Contact a Lumacurve representative today at 800-258-1997 to set up a field trial at your airport. If you decide at any point during your evaluation that an LED upgrade isn't the right move for you, just return your upgrade kit and Lumacurve will issue a full credit.
